

## Remarks

This amendment under 37 CFR 1.312 is responsive to the Notice of Drawing Inconsistency with Specification sent November 5, 2009. The amendment resolves the inconsistency by adding to the Brief Description of the Drawings in the specification a new paragraph (par. 0030.1) describing Fig. 4D. This description is based upon material appearing in the originally filed specification in paragraph 0064, on page 21, and thus does not represent new matter.

This amendment embodies merely the correction of formal matters in the specification, is being made before payment of the issue fee, and in any event was required by the Office of Patent Publication (PUBS). Accordingly, its entry would appear to be proper under the procedures set forth in MPEP 714.16(d).

Respectfully submitted,  
IRA L. CHAVIS et al.
